I am a 4th semester Information Technology student at Del Institute of Technology. Proficient in PHP, CSS, JS, MySQL and Laravel for web development. Also skilled in Dart for mobile applications. Seeking to improve skills through Independent Internship program to bridge theory with practical experience and gain valuable certification for the dynamic technology industry.

Education Level

Institut Teknologi Del   Aug 2022 - Present
Diploma in Information Technology, 3.13/4.00

Projects

SECOND YEAR PROJECT - SISTEM INFORMASI ADMINISTRASI YAYASAN PENDIDIKAN ANAK RUMAH DAMAI   Jan 2024 -
Fullstack Developer

- This project is the second final project which is a requirement to continue my study program. I built this website using PHP programming language with Laravel framework, JavaScript, and MySQL.

TERNAK SEPATU   Jan 2024 - May 2024
Fullstack Developer

- This project is a course project that aims to improve online shoe sales with the help of a simple dynamic website. I built this website using the C# language and the ASP.NET MVC and ASP.NET Web Services frameworks, as well as JavaScript.

CAMPUS INFORMATION SYSTEM-MOBILE   Dec 2023
Fullstack Developer

- This project is a course project that uses Dart and PHP programming languages with Laravel Framework and Flutter. I acted as a FullStack Developer, working on the BackEnd and FrontEnd parts. For BackEnd, I used Laravel to develop web services and APIs. While in FrontEnd, I use Flutter to consume the API.

DESKTOP LIBRARY MANAGEMENT APP   Nov 2023 - Dec 2023
FullStack Developer

- This project is a course project, this project uses the Java and SQL programming languages. Here I play the role of FullStack Developer. Working on the BackEnd and FrontEnd parts.

FIRST YEAR PROJECT - DESA BALIGE II   Jan 2023 - Jun 2023
Frontend Developer

- This project is the first final project that is a requirement in order to advance in my study program. I built this website using the PHP program language with the Laravel framework, JavaScript, and MySQL.

RIVALDO FLORIST   Jan 2023
FullStack Developer

- This project is a simple dynamic website project. I built this website using PHP programming language with Laravel framework, JavaScript, and MySQL.

KLINIK YAYASAN DEL   Nov 2022 - Dec 2022
Frontend Developer

- This project is a course project. In this project I acted as a Frontend Developer who built a website with a simple display about the Del Foundation clinic in Laguboti, Toba. This website is only a static website without any special logic flow in it.
